NHANES 2005–2006 Data Documentation

Questionnaire Section: Physical Functioning (PFQ_D)

First Published: November 2007

Last Revised: NA

Component Description

The physical function section (PFQ) provides self-reported data on functional limitations caused by long-term physical, mental, and emotional problems or illness. It can be used to assess an individual's level of disability.

Eligible Sample

All survey participants 1 or more years of age were eligible. Participants 1 to 4 years of age were asked about play activities. Those less than 18 years of age were asked about receiving Special Education or Early Intervention Services. Respondents 1 to 19 years of age were asked about mobility (crawl, walk, run) and those 20 or more years of age were asked about their ability to work.

Interview Setting and Mode of Administration

These questions were asked before the physical examination, in the home, using the Computer-Assisted Personal Interviewing-CAPI (interviewer administered) system.

Data Processing and Editing

The data were reviewed and edited for completeness, consistency, and illogical values. The number of days that a respondent reported having a condition (PFD069A-PFD069R) was originally reported as number of days, weeks, months, or years and converted to days.

Analytic Notes

Since the questions were asked in the home interview, the interview sample weights may be used in their analysis. However, if the data is joined with data from the Mobile Examination Center (MEC), the MEC sample weights should be used.

Please refer to the Analytic Guidelines for further details on the use of sample weights and other analytic issues. The Analytic Guidelines are available on the NHANES website.
